

**Subject:** Cedar Point Community Contact Transition

Greetings CLC members,

In January, I sent a note letting you know that Suncor had sold its 50% interest in the Cedar Point II Wind Facility to Fiera Infrastructure. Over the last few months we have been transitioning the role of project administrator to NextEra Energy Canada who is also the Owner/Operator of the project.

I'm pleased to share the following updates regarding that transition:

- The new Cedar Point II website can be found at this link: <http://www.nexteraenergycanada.com/projects/cedarpoint2.shtml>. The website contains the same project information that had been on the Suncor hosted site. The new project email address is [cedar-point-ii-wind@nexteraenergy.com](mailto:cedar-point-ii-wind@nexteraenergy.com) and project phone number is 1-877-257-7330. NextEra's 24-hour contact number for urgent concerns or complaints is 1-877-463-4963.
- The website also includes the [Bird and Bat Monitoring summary report](#), which shows the results of the 2016 post-construction monitoring program that were discussed at the December 2016 CLC meeting.
- The Acoustic (Sound) Monitoring summary report is currently being drafted and will be shared with you (and posted to the project website) when it is completed.

I'd also like to take this opportunity to introduce you to Derek Dudek of NextEra Energy. Derek has attended several of our CLC meetings in the past as is nearby at offices just outside of Parkhill. While Cedar Point II has formally submitted its request to the MOECC to discontinue the formal Community Liaison Committee, the project remains committed to engaging with local communities and stakeholders. Please feel free to reach out to Derek with questions or concerns and to stay in touch regarding future public engagement opportunities.

It's been a pleasure working with you these last 9 months that I've been a part of the CLC and on behalf of Suncor I'd like to thank you for your openness and willingness to provide valuable community perspective in the development, construction and operations of the Cedar Point II Wind Energy Centre.

Thank you and take care,  
Anne
